

NebulaOps v22.4 Technical Release

Frontend

Professional technical package summary for the v22.4 delivery. This document uses v22.4 release references only.

Area	Description
Shell integration	The shell manifest is aligned to v22.4. Identity Admin is available as an additional micro frontend without replacing existing sections.
TASK Kanban	Task Management includes a board with To start, In progress, To test and Done columns, local drag and drop, add and delete actions and API-backed movement.
Identity Admin UI	The Identity Admin remote provides realm selection and user, group and role panels that call gateway identity endpoints.

Release version: 22.4.0

Package label: NebulaOps v22.4
