

NebulaOps v22.4 Technical Release

Release Notes

Professional technical package summary for the v22.4 delivery. This document uses v22.4 release references only.

Area	Description
Release	NebulaOps v22.4 extends the existing delivery while keeping the established package structure.
Functional changes	Kanban task workflow, assignee notifications, Keycloak realm administration and Redis list caching are included.
Validation	Package validation, YAML validation, frontend shell build, selected MFE builds and Go tests are expected to be executed before release delivery.

Release version: 22.4.0

Package label: NebulaOps v22.4
